

Modern lightweight wall-mounted screen

The PermScreen stands out thanks to its compact design. The projection screen is integrated into a lightweight aluminum frame. The screen is attached to the rear of the frame so that the screen is perfectly taut. The black aluminum frame not only provides a modern look but also ensures a crisply outlined, high-contrast image. With its successful combination of design and image quality, the PermScreen is widely used for exhibitions and "Home Cinema" applications.

PermScreen

- ù **Projection screen with compact, modern design.**
- ù **Lightweight, easy-to-assemble aluminum frame.**
- ù **Projection screen is kept taut by press-stud attachment on the rear of the frame.**
- ù **Frame (4 cm) also serves as a black border all around.**
- ù **Available in various video and HDTV formats.**
